CITY MULTI

PAC-IT51/52AD-E

Submittal Date:

IT Signal Adapter

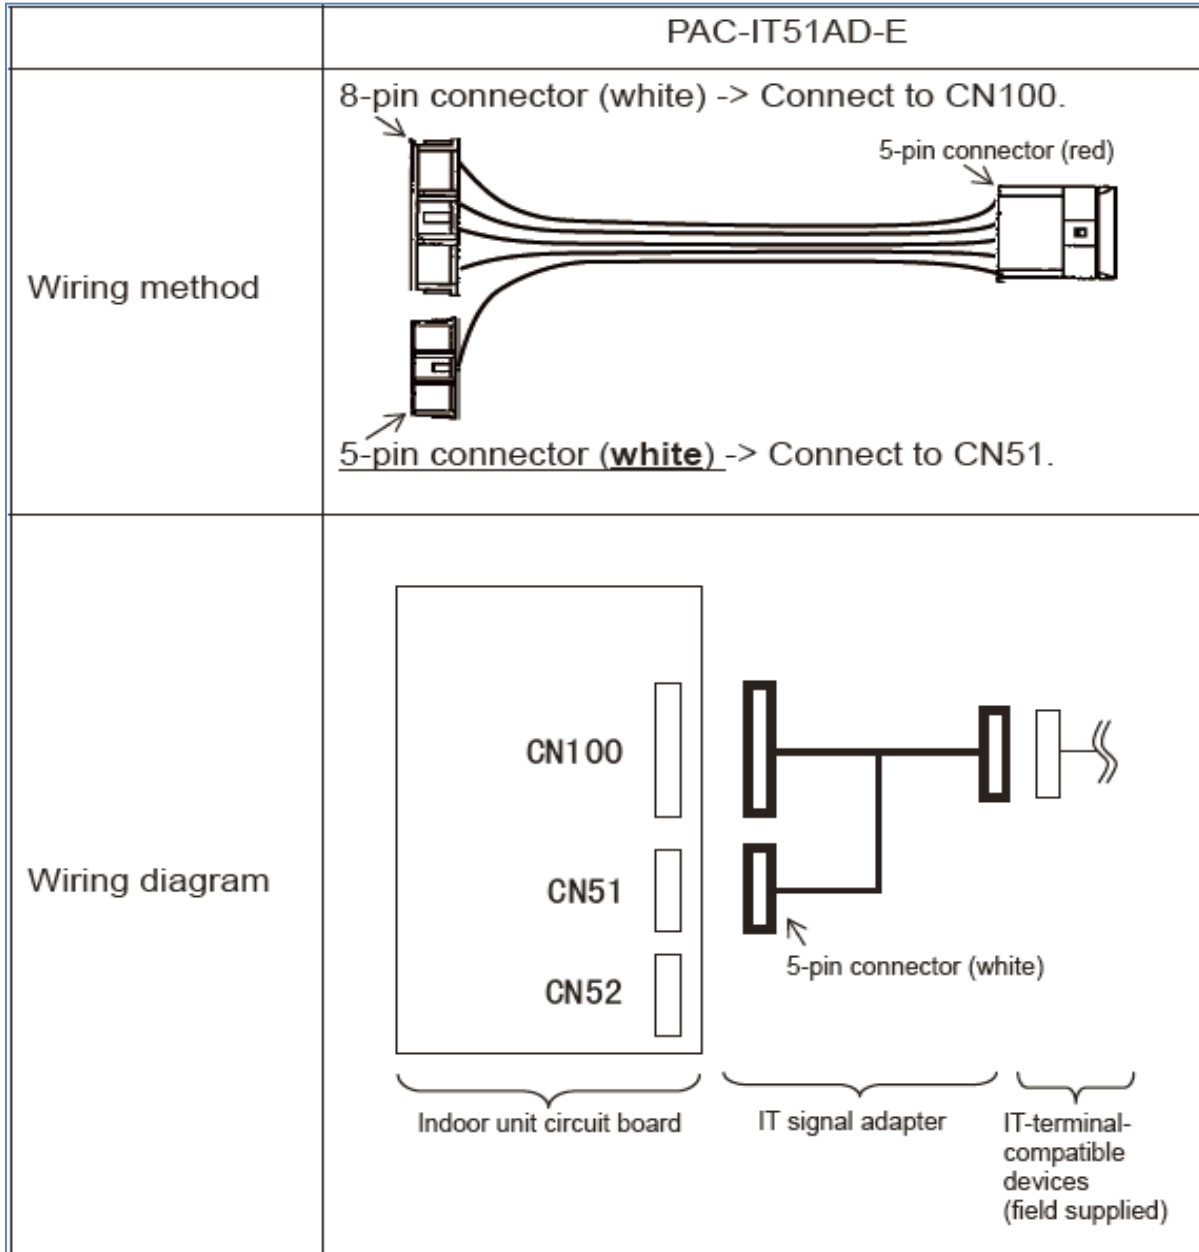

Actual adapter shown in photo.

The New PAC-IT51AD-E and PAC-IT52AD-E (shown in picture) IT signal adapter allows any City Multi Indoor unit equipped with CN100 and CN51 or CN51 terminals, to be turned into an IT Terminal for the intended use of the Procon IO device or MHK1 Honeywell Remote Controller.

Note: Because of different pin configurations used between the PAC-IT51AD-E and the PAC-IT52AD-E for power source reasons, they are NOT interchangeable. Please use the adapter with the correct corresponding CN connector number.
